

Boise Centre Health Crisis Guidelines

Boise Centre recognizes the inherent challenges when scheduling and executing an event during uncertain times, especially when a health crisis impacts the general population. To alleviate concerns and instill confidence, Boise Centre is committed to leading events through adjustments that will be made to our otherwise standard operating procedures as outlined in the Rules and Regulations and Event Promoter Guide. The following guidelines will be implemented in the event of a health crisis and will be adjusted according to mandates issued by local, state, and federal health authorities.

1. User is required to track registrations or maintain an accurate sign in sheet for all staff, attendees, vendors, and/or guests, and shall provide this list to Boise Centre upon request to allow for any necessary contact tracking recommended by health authorities. This list must be maintained and available for a minimum of forty-five (45) days after User's event.
2. While health crisis situations can vary, Boise Centre's basic guidelines will require, at a minimum:
 - All individuals be subject to temperature screenings when entering the facility by use of thermal imaging cameras or other such devices deemed acceptable by local, state, or federal health agencies, and any restrictions related to temperature ranges will be followed.
 - All other required protocols based on local, state, or federal agencies will be strictly enforced.
3. When and where possible, public access shall be designated as either entrance or exit only to limit pedestrian cross traffic and encourage physical distancing.
4. User shall adhere to all building requirements intended to meet or exceed guidelines set forth by local, state, and federal health authorities and in effect at the time of the event.
